

The American Weigh

American Scale Corporation

Fourth Quarter 2015

Volume 3, Issue 4

The ZM400 Series weight indicators are highly adaptable and can be precisely configured and programmed using Ztools 2.0 enabling them to meet a wide range of application solutions.

Introducing the ZM400 Series Programmable Indicator from Avery Weigh-Tronix

The ZM400 series weight indicators are designed for industrial applications that require advanced weighing routines and high connectivity. These programmable indicators are highly adaptable, user-friendly and can be precisely configured and programmed to meet the needs of your operation.

Enclosures: IP69K certified, 304 brushed stainless steel. Designed for long service in extreme conditions, including corrosive environments and frequent heavy washdown, they are available in desk, wall or column mount versions.

Flexibility: Compatible with a wide range of weighing platforms: bench and floor scales, truck scales, scales for batching, counting and

checkweighing. Designed to provide a fully-configurable solution, and supports application programs that have been built on legacy platforms.

Versatile Connectivity: Offers multi-connectivity, ensuring compatibility and communication between old and new peripheral technologies. Ethernet port and two RS232 serial interface ports are standard. Analog output, USB device, Current Loop, RS485/RS422 and Ethernet wireless are also available options.

Process Control: Supports up to 40 set-points to program the scale to automate and control processes such as mixing or blending.

In-motion Weighing: Ideal for conveyor scales as it can connect with up to 16 analog weight sensors and can connect to two scales.

Inbound/Outbound: Can store gross, tare and net weights against container/vehicle IDs. Ideal for any application where container weights need to be recorded against an alphanumeric tare ID/register.

GET TO KNOW US...

It's always nice to know a little about the people with whom you do business. To help everyone know just who we are, we will introduce and profile a staff member in each newsletter.

Matt Majorowski Service Technician

Birthplace:
Point Magoo, CA

Currently:
Louisville, KY

Education:
Technical Degree in HVAC from Pittsburgh;
Rice Lake Weighing Systems, troubleshooting courses.

Family:
Matt and his wife Rachel have two teenage daughters, Victoria and Jessica

What do you do when you're not working?

I enjoy road trips on my motorcycle and spending time with my family.

What are some of the other jobs you have had throughout your career?

I have been a logger, plumber, delivery driver and general maintenance repair person.

What do you like most about your job?

The ability to meet different people and visit different companies and see what and how they do what they do.

What do you find most challenging about your position/ the industry?

Keeping up with all the new equipment and technologies AND remembering all the old ones as well.

If you could visit anywhere in the world, all expenses paid, where would it be and why?

Definitely Alaska. I would enjoy the wilderness and untouched country for the challenges it would bring.

If you could live in any other time, when might that be and why?

The 1850s, for the ability to explore places no one has seen and the options were endless.

IN MEMORIAM

David V. Laswell, III

1948-2015

The American Scale family lost a dear friend and colleague when David Laswell III, 67, passed away September 3, 2015. He left this world peacefully, surrounded by his wife, family and friends.

Many of you may remember "Senior" as one of our most knowledgeable service technicians and programmer. Dave worked with us at American Scale for 15 years. He excelled as a mentor and teacher to fellow technicians.

Dave enlisted in the Army when he was 17 years old and served his country honorably, while achieving honors and decorations including: Special Forces, Airborne and a Purple Heart Cluster. He served three tours of duty in Vietnam and in Desert Storm. Dave was an avid golfer and hunter. He enjoyed being outside with friends and family. He will be missed.

"I have been working with scales for 40+ years. I have had service technicians come and go. David Laswell was the all-around best technician that I have ever known. He could fix any mechanical or electronic scale known to man. His work ethic set an example for the younger technicians. He would never let one of the younger technicians out work him. Not only was David a Great Scale Technician, he was a man of integrity. He was also my friend. I know for sure that we will meet again one day in heaven." Danny Coyle, President

"Dave was a delightful person and always had a funny story or memory to share. Whenever I had a scale related question, he was my "go-to-guy", because he could answer in plain English instead of scale speak. He will be missed." Janet Conway, Administration & Finance Manager.

"From the first day I met Senior, he showed that he cared about his work and about teaching us young technicians. He put on a rough and tough exterior to train us, but you could tell that he cared about the company and about us learning the trade. That extended past work hours as he also always lent a listening ear and a word of advice when needed. Personally, he spent time with me to teach me the programming side of this job, for which I am continually thankful. I enjoyed his stories and tough love on the job and friendship through everything else. He will be missed." Thom Scott, System Specialist

"I first met Dave 23 years ago while playing golf. The Scale Dealers Association had a golf scramble and we were courting Dave to join our team. It worked because he was hired before the day was out. As a co-worker, "Senior" was great because he could do everything. He was a brilliant scale technician and programmer. He was a good friend and golf buddy. During our annual golf marathon trips to Maggie Valley he was an entertaining story-teller and enjoyed talking shop even when off-duty. He will be missed by all and remembered always." Mark Thompson, Operations Manager

**Gone are the days we used to share
But in our hearts you're always there.
Never more than a thought away
Loved and remembered every day.**

For those who wish to send a condolence message to Dave's family, you can sign the funeral home guest book using the following link:

GET TO KNOW US... (Continued)

If you could have dinner with two famous people from history (alive or dead), who would they be and why?

James Butler "Wild Bill" Hickok, American frontiersman, army scout and lawman who helped bring order to the frontier West. His ironhanded rule helped to tame two of the most lawless towns on the frontier. He took care of business the best way he knew how.

What are you most proud of?

No doubt, my wife and children.

*"Being honest may not get you a lot of friends,
but it'll always get you the right ones."* Unknown

SCALE RENTAL

It's approaching fast —
END OF YEAR INVENTORY

Are you prepared?
Our rental services include weighing and counting scales. Our extensive inventory is tested and calibrated according to our ISO/IEC 17025 Quality System.
