

WEIGH-TRONIX

Tough, accurate
scales that cut
costly production
line interruptions

Monorail scale

Monorail Scale

Features & benefits

- **Tough Weigh Bar design-** Provides consistently accurate weight readings day after day.
- **Reduced Downtime-** No shock sensitive parts. Minimized delay for adjustment and maintenance.
- **Washdown-** Weigh Bar strain gages are potted in polyurethane and enclosed in steel Galvanized rails which resist corrosion.
- **Simple installation-** Existing rail is cut in two places and scale unit is inserted. Uses existing hangers.
- **Static or In-Motion weighing-** Available as an in-motion, 1000 lb capacity model with a 24" live rail. The static model comes in both 1000 lb and 2000 lb capacities with with a 24" or 48" live rail.

Accessories

See your Weigh-Tronix dealer or distributor for the correct weight indicator to be paired with the Monorail Scale. Printers can easily be added to a Monorail Scale system.

Specifications

Live Rail Dimension	Mode	Capacity and Increment (lb)
24"	Static	1,000 x .5
24"	Static	2,000 x 1.0
48"	Static	1,000 x .5
48"	Static	2,000 x 1.0
24"	In-Motion	1,000 x 1.0

Compliance: Monorail Scales meet USDA requirements. Static Monorails are approved legal for trade at 2,000 divisions under NIST Handbook 44 for Class III weighing devices.
